

THE UNIVERSITY OF CHICAGO

Abstract of Disclosure

An online method and system for issuing vehicle repossession assignments to vehicle repossession contractors. The invention includes at least one server computer configured to host a secure online account for a vehicle repossession contractor. The online account is remotely and securely accessible by the contractor and maintains at least one vehicle repossession assignment assigned to the contractor. Vehicle repossession agents access the server computer, define contractor profiles and assign new vehicle repossession assignments to contractors via the contractor's online accounts. Contractors remotely access their online accounts to receive new repossession assignments, accept or reject the assignments, and input feedback regarding a completed repossession assignment. Server computer may be additionally configured to page or otherwise initiate notification to a contractor that a new repossession assignment is pending at the contractor's online account.
